To Whom It May Concern:

This letter is to verify our business relationship with Bison Software and express how pleased we are with their system and service.

We have had a couple of other POS systems which were alright but to get them tweaked to fit our application was next to impossible, they wanted you to adapt to their system. With Bison Software the guys were able to work their magic and get their program to accomplish all the tasks we required of it and add on some very useful extras. If there ever was a new report that we thought we needed the guys programmed it very quickly and had the updates installed just as quick.

We have been enjoying their program for 6 years now and I'd have to say their service is even better than their program. If we ever had a problem with features they were always available to come in or talk us through the problems.

If anyone was considering their product or services and wanted to talk to an existing customer they could certainly call me and I'd be happy to talk about their product and service.

Sincerely

Gord Sando
President
