BISON CUSTOMIZED SOFTWARE AND CONSULTING

Attention: Michael And Robert Zacharias

RE: Letter Of Recommendation

To Whom It May Concern;

In May of 2006 we contracted with Bison Software to upgrade our existing DOS production and accounting program into a Windows format.

In the past 30 years of being in business we have contracted many computer development people doing various software upgrades and hardware interfaces. The interaction our firm has with Bison Software is the most professional and as a result we are using a program that is the most functional for our industry. From the onset the support was and still is exemplary.

I have no hesitation in recommending Bison Software for any computer software development or computer consultation.

Yours truly,

A handwritten signature in blue ink, appearing to read 'Gordon W. Turnbull', is written over a horizontal line.
